GOOGLE'S LAB TEST

11.7% passed.

Only 11.7% of sites showed their main content within Google's 2.5-second mark, on a simulated mid-range phone.

BUT THERE IS A CATCH

That number is the lab test.

LAB TEST	REAL VISITORS
A simulated mid-range phone, throttled	Google’s field data, where it exists

The lab test is deliberately tough. It is close to a worst case, not what every visitor sees.

SHARE THAT PASSED THE 2.5-SECOND MARK

Lab vs real users

REAL-VISITOR DATA EXISTS FOR ABOUT 23% OF SITES (2,887 OF 12,621)

THE TAKEAWAY

A lab score is a warning, not a verdict.

The honest check is the same either way: open your own homepage on a real phone, on mobile data, and see what loads first.

IS YOURS DOING THIS?

We'll show you what to fix first.

A free review of your homepage on a phone. Plain English, no obligation.
